

Attorney's Docket: 2003DE139
Serial No.: 10/582,769
Group: 1793

Amendments to the Claims

- 1) (Currently Amended) A pigment preparation comprising C.I. Pigment Yellow 74 of formula (I) as base pigment and C.I. Pigment Yellow 62 of formula (II) as pigment dispersant

- 2) (Currently Amended) The pigment preparation as claimed in claim 1, containing
- 50% to 99.9% by weight of the C.I. Pigment Yellow 74,
 - 0.1% to 25% by weight of the C.I. Pigment Yellow 62
 - 0 to 25% by weight of at least one auxiliary,
- the ~~fractions~~ weight percentages of the respective components being based on the total weight of the preparation, 100% by weight.
- 3) (Currently Amended) The pigment preparation as claimed in claim 1, containing
- 60% to 99.5% by weight of the C.I. Pigment Yellow 74,

Attorney's Docket: 2003DE139
Serial No.: 10/582,769
Group: 1793

- b) 0.5% to 15% by weight of the C.I. Pigment Yellow 62
 - c) 0.1 to 15% by weight of at least one auxiliary,
the ~~fractions-~~ weight percentages of the respective components being based on the total weight of the preparation, 100% by weight.
- 4) (Currently Amended) The pigment preparation as claimed in claim 1, containing
- a) 65% to 99% by weight of the C.I. Pigment Yellow 74,
 - b) 1% to 10% by weight of the C.I. Pigment Yellow 62
 - c) 0.1 to 15% by weight of at least one auxiliary,
the ~~fractions-~~ weight percentages of the respective components being based on the total weight of the preparation, 100% by weight.
- 5) (Previously Presented) A process for producing a pigment preparation as claimed in claim 1, comprising the step of mixing the base pigment and the pigment dispersant, and, optionally, at least one auxiliary.
- 6) (Previously Presented) A process for producing a pigment preparation as claimed in claim 1, comprising the step of jointly synthesizing the pigment dispersant and the base pigment.
- 7) (Currently Amended) A high molecular weight organic material of natural or synthetic origin pigmented by the pigment preparation as claimed in claim 1, wherein the high molecular weight organic material of natural or synthetic origin is selected from the group consisting of plastics, resins, varnishes, paints, electrophotographic toners, electrophotographic developers, electret materials, color filters, inks, ink-jet inks, printing inks, and seed.

Attorney's Docket: 2003DE139
Serial No.: 10/582,769
Group: 1793

8) (Previously Presented) A solvent-borne printing ink system comprising the pigment preparation as claimed in claim 1.

9. (Previously Presented) An aqueous printing ink system comprising the pigment preparation as claimed in claim 1.
